

## Language

Please use the dropdown menu on the top right to select which language you would prefer to take this survey in.

XXX TRANSLATION OF THE ABOVE SENTENCE IN YOUR LANGUAGE  
HERE XXX

## Consent

**Are you 18 years of age or older?**

- ☐ Yes
- ☐ No

**Would you like to participate in this study?**

- ☐ Yes
- ☐ No

**Failed Age**

Sorry, you can participate only if you are 18 years of age or older, so you will not be able to continue the survey. Please return the assignment.

Thank you for your interest in our research!

## Failed Consent

Sorry, you can participate only if you agree to the consent form, so you will not be able to continue the survey. Please return the assignment.

Thank you for your interest in our research!

## Age and Gender

**What gender do you identify as?**

(Please select all that apply)

- ☐ Male
- ☐ Female
- ☐ Nonbinary
- ☐ Prefer not to say
- ☐ Other

**How old are you?**

## Attention check 1

In studies like ours, there are sometimes a few people who do not carefully read the questions they are asked and just "quickly click through the survey."

These random answers are problematic because they compromise the results of the studies. It is very important that you pay attention and read each question. In order to show that you read our questions carefully (and regardless of your own opinion), please answer "Tik Tok" in the question on the next page.

When an important event is happening or is about to happen, many people try to get informed about the development of the situation. In such situations, where do you get your information from?

- ☐ TV
- ☐ Twitter
- ☐ Radio
- ☐ Facebook
- ☐ Youtube
- ☐ Newspapers
- ☐ Reddit
- ☐ Tik-Tok
- ☐ Other

### **Failed Attention Check**

Sorry, you can participate only if you pass the attention check, so you will not be able to continue the survey. Please return the assignment.

Thank you for your interest in our research!

### **Attention check 2**

Please read the following information carefully.

Roses are one of the most popular flowers, grown all around the world. There are now almost three hundred species of roses, with a huge number of different colors, shapes, fragrances, and sizes. While most roses originated in Asia, smaller numbers are native to Europe, North America, and North Africa. Roses are often gardener's favorite plants to grow because of their beauty and the strong fragrance that they have. There are many things to consider when growing roses. While they enjoy sunshine, they are a very thirsty plant and will need regular watering in hotter, drier climates.

On the previous page you read some information about roses. Which of the following was **NOT** discussed?

- ☐ Roses often prefer to be planted where they can receive a lot of sunshine
- ☐ Roses can suffer with pests like aphids and blackfly
- ☐ Roses are often thirsty plants and appreciate regular watering
- ☐ There are nearly three hundred rose species
- ☐ Roses are one of the most popular flowers
- ☐ Most roses originated in Asia

## Intro

In this task you will read about three different debates that are happening right now around the world.

We will give you some of the justifications that politicians and experts are

giving for different policies, and ask you some questions about your opinions.

Please read each scenario carefully and answer as honestly as you can.

## **Tracing Intro**

COVID-19 remains a threat to public health. Scientists are suggesting that an effective way to prevent the spread of COVID-19 is through wide-reaching and mandatory "contact tracing." This works by using technology to trace people's movements and interactions with other people. If someone tests positive for COVID-19, the technology can alert others who have been in contact with that person.

Public officials are considering a new contact tracing program that goes much further than current contact tracing efforts. This new program is estimated to be more effective at containing the pandemic, but is also more invasive of individual privacy. This proposal involves delivering inexpensive contact tracing devices to all residents. The small devices, which don't require a mobile phone and can be worn on a lanyard or carried in a handbag, use GPS and cellular technology to continuously trace the wearer's movements. The new program would require residents to carry a tracing device whenever they leave their homes, and residents could be fined if they fail to bring the device with them.

Some are arguing that the government should make it mandatory for individuals to carry tracing devices with them whenever they leave their homes. They are saying that sometimes you have to sacrifice privacy for the greater good.

Others argue that these tracing devices should be only voluntary, because

forcing residents to wear them anytime they leave their homes would violate their rights to privacy.

## Tracing Behavioural Task (Consq First)

**We now ask you to make a choice that has real financial consequences.** A few days ago, a group of 100 people were recruited via an international online marketplace and invited to make donations to the charitable organization UNICEF. In total, they donated an amount equivalent to \$71.80.

**We would like you to vote for a leader to be responsible for the entire group's donations.** The leader has two options:

- They can transfer the group's \$71.80 donation to UNICEF in full, or
- They can take some of this money for themselves (up to the full amount) and transfer whatever amount is left to UNICEF.

We now want you to vote between two people to be the leader responsible for the donations. We showed both people the debate you just read about mandatory contact tracing, and asked them what they thought.

1. **Person 1 believes that it should be mandatory for residents to carry tracing devices whenever they leave their homes.** They agreed with the statement, "*We need to control the pandemic, and sometimes you have to sacrifice the right to privacy for the greater good.*"
2. **Person 2 believes that it should be voluntary for residents to carry tracing devices whenever they leave their homes.** They agreed with

the statement, *"Everyone has a right to privacy, and we cannot sacrifice this right in an effort to control the pandemic."*

**Please vote for which person you wish to be the leader.** For the person who gets the majority number of votes, we will implement their decision and make the payments accordingly.

- ☐ Person 1, the person who believes that it should be mandatory for residents to carry tracing devices whenever they leave their homes.
- ☐ Person 2, the person who believes that it should be voluntary for residents to carry tracing devices whenever they leave their homes.

## Behavioral Comprehension

In the last page, you were asked to choose a leader that will be entrusted with the group's donation. Please select the option that best describes what the leader will be able to do with the donation.

- ☐ The leader chooses how much of the group's donation to transfer to The Red Cross and how much to transfer to Medecins Sans Frontiers.
- ☐ The leader chooses how much of the group's donation to keep for themselves and how much to return to the people who donated the money.
- ☐ The leader chooses how much of the group's donation to keep for themselves and how much to transfer to UNICEF.

Thank you for answering these questions. You'll now move on to the next part of the study.

## Medicine Intro

COVID-19 remains a public health threat. Public health officials have announced that citizens should be on alert for another dangerous wave of the pandemic.

Imagine that a pharmaceutical company based in the U.S. has developed an effective treatment. The company is manufacturing the medicine as quickly as possible, but it is unlikely there will be sufficient supplies when the next wave hits. Political leaders are debating how the medicine should be

distributed around the globe.

Some are arguing that the medicine should be sent wherever it can achieve the greatest good, even if that means sending it to other countries.

Others are arguing that the medicine should be kept in the U.S., because the government should focus on treating its own citizens.

## **PPE Intro**

Think ahead several months into the future. Imagine that COVID-19 cases are rising again around the world and public health officials have announced that citizens should be on alert for another dangerous wave of the pandemic.

If the predictions are correct, there will soon be another global shortage of personal protective equipment (PPE). Political leaders are debating how personal protective equipment should be distributed around the globe.

Some are arguing that PPE made in American factories should be sent wherever it can do the most good, even if that means sending it to other countries.

Others are arguing that PPE made in American factories should be kept in the U.S., because the government should focus on protecting its own citizens.

### **Self-report Comprehension**

In the last page, you read about a mayor in a city in your region, and were asked about them. Please select the option that best describes the questions you were asked.

☐ How much I admired the mayor

☐ How much I trusted the mayor

☐ How much I agreed with the mayor

Thank you for answering these questions. You'll now move on to the next part of the study.

## Ventilators Intro

COVID-19 remains a public health threat. Public health officials have announced that citizens should be on alert for another dangerous wave of the pandemic.

If the predictions are correct, there will not be enough ventilators and hospital beds to treat everyone, and doctors are going to have to make difficult decisions about how to ration medical care. Political leaders are calling for a policy to be put into place now so the same standards can be applied in hospitals across the country.

Some are arguing that when allocating access to ventilators and other forms of healthcare, doctors should prioritize younger and healthier people because they are more likely to survive treatment.

Others are arguing that everyone should have equal access to treatment, regardless of their age or health status.

## **Lockdown Intro**

Think ahead several months into the future. Imagine that the U.S. is in the middle of another wave of the COVID-19 pandemic, and there is still no vaccine available. After a surge in cases, political leaders have imposed

strict nationwide restrictions, with stay-at-home orders and closures of schools, offices, shops, restaurants, bars, theaters, and so on.

These restrictions have now been in place for three months. It's clear that the policy is working to reduce the number of deaths, especially amongst vulnerable people. However, these prolonged restrictions are taking their toll. Mental health experts and economists are increasingly concerned about the effects of continued restrictions on people's overall wellbeing. Because of this, political leaders are debating when to lift the restrictions and reopen schools and businesses.

Some are arguing that we should consider lifting the restrictions immediately. They argue that even though resuming activities now will cause more COVID-related deaths in the short-term, the economic and social consequences of continuing the prolonged restrictions could cause worse suffering overall in the long term.

Others are arguing that the restrictions should stay in place at least until a vaccine is available. They argue that the country has a primary responsibility to protect its vulnerable citizens, and that this must take priority.

We now want you to vote between two people to be the leader responsible for the donations. We showed both people the debate you just read about keeping personal protective equipment in the U.S., and asked them what they thought.

1. **Person 1 believes that U.S.-made PPE should be given to whoever needs it most, even if that means sending it to other countries.** They agreed with the statement, *"COVID-19 is a global pandemic that affects all humans. We need to be impartial in how we distribute resources like PPE and send it where it can achieve the greatest good."*
2. **Person 2 believes that U.S.-made PPE should be reserved for protecting American citizens.** They agreed with the statement, *"We have a duty to protect our own citizens first, not everyone in the world."*

*Other countries are responsible for protecting their own citizens from COVID-19."*

**Please vote for which person you wish to be the leader.** For the person who gets the majority number of votes, we will implement their decision and make the payments accordingly.

- ☐ Person 1, the person who believes that U.S.-made PPE should be given to whoever needs it most, even if that means sending it to other countries.
- ☐ Person 2, the person who believes that U.S.-made PPE should be reserved for protecting American citizens.

## **Lockdown Deontological**

Imagine that the mayor of a major city in your area is arguing that restrictions should stay in place at least until a vaccine is available.

*This mayor said, "As leaders, our primary duty is to protect our citizens. We must think of our responsibilities to one another, and we cannot sacrifice some of our most vulnerable people in pursuit of the greater good."*

## Lockdown Consequentialist

Imagine that the mayor of a major city in your area is arguing that we should consider lifting restrictions immediately.

This mayor said, *"We need to think about all the consequences. Preventing deaths from COVID isn't all that matters, and continuing these prolonged restrictions will have a far worse effect on our overall well-being."*

## **Medicine Behavioural Task (Deon First)**

**We now ask you to make a choice that has real financial consequences.** A few days ago, a group of 100 people were recruited via an international online marketplace and invited to make donations to the charitable organization UNICEF. In total, they donated an amount equivalent to \$71.80.

**We would like you to vote for a leader to be responsible for the entire group's donations.** The leader has two options:

- They can transfer the group's \$71.80 donation to UNICEF in full, or
- They can take some of this money for themselves (up to the full amount) and transfer whatever amount is left to UNICEF.

We now want you to vote between two people to be the leader responsible for the donations. We showed both people the debate you just read about distributing medicine for COVID, and asked them what they thought.

1. **Person 1 believes that U.S.-made medicine should be reserved for treating American citizens.** They agreed with the statement, "*We have a right to use our own resources to help our own citizens before everyone else. Other countries can produce their own treatments for COVID-19.*"

2. **Person 2 believes that U.S.-made medicine should be given to whoever needs it most, even if that means sending it to other countries.** They agreed with the statement, *"COVID-19 is a global pandemic that affects all humans equally. We need to be impartial and send treatment where it can achieve the greatest good."*

**Please vote for which person you wish to be the leader.** For the person who gets the majority number of votes, we will implement their decision and make the payments accordingly.

- ☐ Person 1, the person who believes that U.S.-made medicine should be reserved for treating American citizens.
- ☐ Person 2, the person who believes that U.S.-made medicine should be given to whoever needs it most, even if that means sending it to other countries.

**Which country do you currently live in?**

- ☐ COUNTRY
- ☐ Other

**Which US State do you currently live in?**

**What is the highest level of education you have completed?**

- ☐ Some primary school
- ☐ Completed primary school
- ☐ Some secondary school
- ☐ Completed secondary school
- ☐ Some university
- ☐ Completed university
- ☐ Some advanced study beyond university
- ☐ Advanced degree beyond university

**Think of this ladder below as representing where people stand in your country.** At the top of the ladder are the people who are the best off, those who have the most money, the most education, and the most respected jobs. At the bottom are the people who are the worst off, those who have the least money, the least education, the least respected jobs, or no job. The higher up you are on this ladder, the closer you are to the people at the very top; the lower you are, the closer you are to the people at the very bottom.

**Where would you place yourself on this ladder?** Please indicate the number corresponding to the position on the ladder where you think you stand at this time in your life, compared to people in your country.
