Intro

In this task you will read about three different debates that are happening right now around the world.

We will give you some of the justifications that politicians and experts are giving for different policies, and ask you some questions about your opinions.

Please read each scenario carefully and answer as honestly as you can.

Lockdown Intro

Think ahead several months into the future. Imagine that the U.S. is in the middle of another wave of the COVID-19 pandemic, and there is still no vaccine available. After a surge in cases, political leaders have imposed a strict nationwide lockdown, with closures of schools, offices, shops, restaurants, bars, theaters, and so on.

You've now been in lockdown for three months. It's clear that the policy is working to reduce the number of deaths, especially amongst vulnerable people. However, this lockdown is taking its toll. Mental health experts and economists are increasingly concerned about the effects of continued lockdown on people's overall wellbeing. Because of this, political leaders are debating when to reopen schools and businesses.

Some are arguing that schools and businesses should immediately reopen. They argue that even though resuming activities now will cause more COVID-related deaths, the economic and social consequences of continuing

the lockdown could cause worse suffering overall in the long term.

Others are arguing that the lockdown should stay in place until a vaccine is available. They argue that the country has a primary responsibility to protect its vulnerable citizens, and that this must take priority.

Which policy do you think should be adopted?

Strongly
support
keeping
the
lockdown

☐☐☐

Indifferent

☐☐☐

Strongly
support
reopening

☐

How morally right or wrong would it be to reopen schools and businesses before a vaccine is available?

Absolutely
morally
wrong

☐☐☐

Neither
right nor
wrong

☐☐☐

Absolutely
morally
right

☐

Lockdown Behavioural Task (Deon First)

We now ask you to make a choice that has real financial consequences. A few days ago, a group of 100 people were recruited via an international online marketplace and invited to make donations to the Red Cross. In total, they donated \$71.80.

We would like you to vote for a leader to be responsible for the entire group's donations. The leader has two options:

- They can transfer the group's \$71.80 donation to the Red Cross in full, *or*
- They can take some of this money for themselves (up to the full amount) and transfer whatever amount is left to the Red Cross

We now want you to vote between two people to be the leader responsible for the donations. We showed both people the debate you just read about reopening schools and businesses, and asked them what they thought.

1. **Person 1 believes that the country should stay in lockdown.** They agreed with the statement, *"As leaders, our primary duty is to protect our citizens. We must think of our responsibilities to one another, and we cannot sacrifice some of our most vulnerable people in pursuit of the greater good."*
2. **Person 2 believes that schools and businesses should reopen.** They agreed with the statement, *"We cannot let the cure be worse than the disease. Preventing deaths from COVID isn't all that matters, and continuing the lockdown will have a far worse effect on our overall well-being."*

Please vote for which person you wish to be the leader. For the person who gets the majority number of votes, we will implement their decision and make the payments accordingly.

- ☐ Person 1, the person who believes the country should stay in lockdown.
- ☐ Person 2, the person who believes schools and businesses should reopen.

Medicine Intro

COVID-19 remains a public health threat. Public health officials have announced that citizens should be on alert for another dangerous wave of the pandemic that may hit the globe this autumn.

Imagine that a pharmaceutical company based in the U.S. has developed an effective treatment. The company is manufacturing the medicine as quickly as possible, but it is unlikely there will be sufficient supplies when the next wave hits. Political leaders are debating how the medicine should be distributed around the globe.

Some are arguing that the medicine should be distributed to whoever needs it most, even if that means sending it to other countries.

Others are arguing that the medicine should be kept in the U.S., because the government should focus on protecting its own citizens.

Which policy do you think should be adopted?

Strongly support U.S.-made medicine being reserved for protecting American citizens				Indifferent				Strongly support U.S.-made medicine being given to whoever needs most

PPE Intro

Think ahead several months into the future. Imagine that COVID-19 cases are rising again around the world and public health officials have announced that citizens should be on alert for another dangerous wave of the pandemic.

If the predictions are correct, there will soon be another global shortage of personal protective equipment (PPE). Political leaders are debating how personal protective equipment should be distributed around the globe.

Some are arguing that PPE made in American factories should be given to whoever needs it most, even if that means sending it to other countries.

Others are arguing that PPE made in American factories should be kept in the U.S., because the government should focus on protecting its own citizens.

Which policy do you think should be adopted?

Ventilators Intro

COVID-19 remains a public health threat. Public health officials have

announced that citizens should be on alert for another dangerous wave of the pandemic that may hit the globe this autumn.

If the predictions are correct, there will not be enough ventilators and hospital beds to treat everyone, and doctors are going to have to make difficult decisions about how to ration medical care. Political leaders are calling for a policy to be put into place now so the same standards can be applied in hospitals across the country.

Some are arguing that when allocating access to ventilators and other forms of healthcare, doctors should prioritize younger and healthier people because they are more likely to survive treatment.

Others are arguing that everyone should have equal access to treatment, regardless of their age or health status.

Which policy do you think should be adopted?

Strongly support everyone having equal access to treatment				Indifferent				Strongly support prioritizing younger and healthier people for treatment
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

How accountable and reliable do you think the Red Cross is as an organization in using donations for disaster relief?

Not reliable at
all

Somewhat
reliable

Very reliable

☐☐☐☐☐

In today's study, you were asked to make a decision involving a \$71.80 charity donation that a leader might choose to donate to charity either in full

or only in part - and keeping the rest for themselves.

We have tried to make this as clear and transparent as possible in our instructions. However, despite our efforts sometimes it can happen that our instructions are not clear enough.

For this reason, we have the following question to you: **Did we communicate the fact that a leader will be entrusted with the \$71.80 clearly and transparently enough in our instructions?**

- ☐ Yes
- ☐ No

If anything was unclear or during the study you had other doubts or remarks about any part of our instructions, please let us know why:

Apart from this, do you have any other remarks or comments about today's study?

THANKS for your participation!

You will be redirected to Prolific on the next page.
